Volaris SUMMERgrains

All-Season Feed

Our Volaris SUMMERgrains is the ideal scatter feed for the wild birds in your garden during the warmer months. It is made with small grains and has a moderate fat and protein content. For the protection young birds, this scatter feed is completely free of peanuts. Volaris SUMMERgrains is easy to feed and suitable for all species of wild birds.

The benefits at a glance:

- for all species of birds
- easy to feed
- low fat content
- extra-small grains
- peanut-free for the protection of young birds
- for year-round feeding

Aanbevolen voeder:

Our volaris SUMMERgrains are suitable for year-round feeding! If you offer the feed in bird houses or feeders, clean them regularly with hot water. In this way you minimise the transmission and spread of pathogens. Make sure that the food cannot get soaked even in strong winds, snow and rain, otherwise it will spoil or freeze and the birds will no longer eat it.

Did you know that robins, yellowhammers, dunnocks and blackbirds are so-called ground feeders? They don't like to go to the feeder, but prefer to pick up the seeds from the ground. If you have space in your garden, provide a ground feeder. Simply fill a wooden or plastic bowl with feed and place it on the ground.

If you offer feed, please also provide drinking water for the birds. Especially in winter, when natural water sources such as puddles or water in gutters are frozen, birds also need an extra bowl of water. However, there is no need for an expensive bird bath at the bird feeder; a flower pot saucer or an old soup plate are perfect as a watering place. The water should be changed regularly.

Samenstelling: Tarwe (vlokken), Haver (vlokken), Zonnebloempitten, Sunflower seed, dehulled, Mariadistelolie, Maïs (vlokken)
